The reaction scheme shows the synthesis of 2-(benylthio)-1-nitrobenzene. The first reactant is 1-iodo-2-nitrobenzene, a benzene ring with a nitro group (NO2) at position 1 and an iodine atom (I) at position 2. The second reactant is benzyl thiol, consisting of a benzene ring attached to a methylene group (-CH2-) which is further attached to a thiol group (-SH). The product is 2-(benylthio)-1-nitrobenzene, where the iodine atom from the first reactant has been replaced by the benzylthio group (-CH2-C6H5) from the second reactant. The reaction is indicated by a plus sign between the reactants and a right-pointing arrow leading to the product.
